Thumbnail images are labelled by transect code, year, and photo number. Full size images with captions follow on subsequent pages.

WLKR6_1983_2.19, Azim. 236: ~50 m from start point in ABGR/PSME forest at ridge;
note rock garden/ERUM-ERCO type, distinct transition to forest w/RUPA at edge.

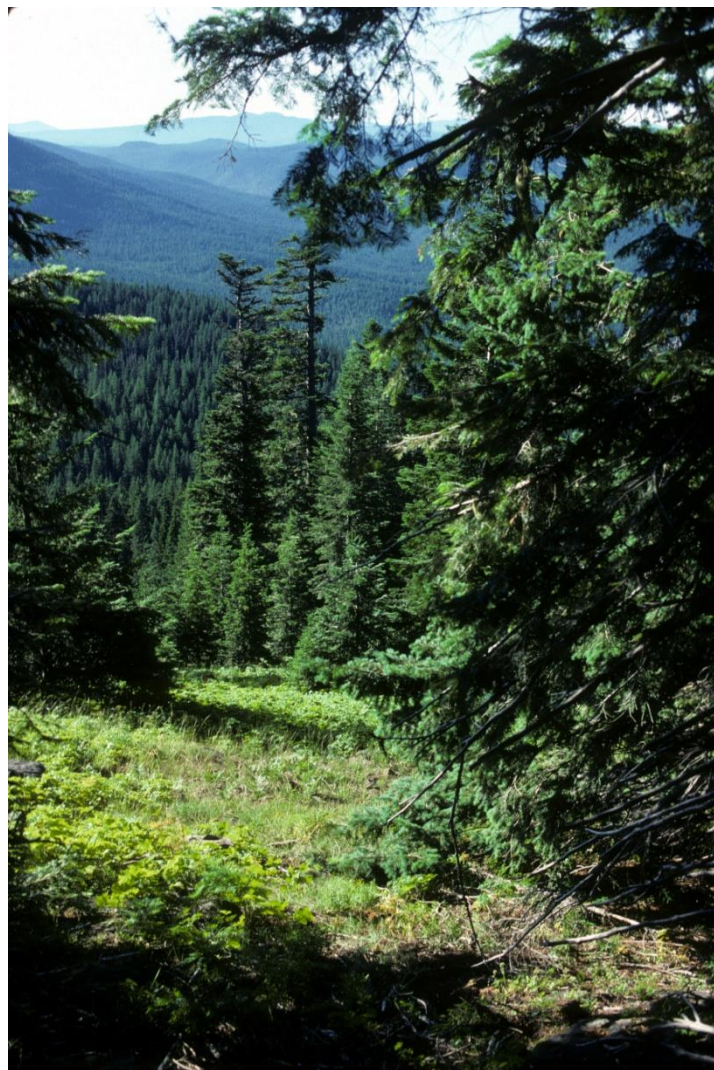

WLKR6_1993_7.12

WLKR6_1983_2.20, Azim. 210: ~15 m to start-point rebar and large tree with flasher; flasher/pack for size/reference. Note twisted based of PSME in foreground (lower R); SMST with variable age ABGR regeneration.

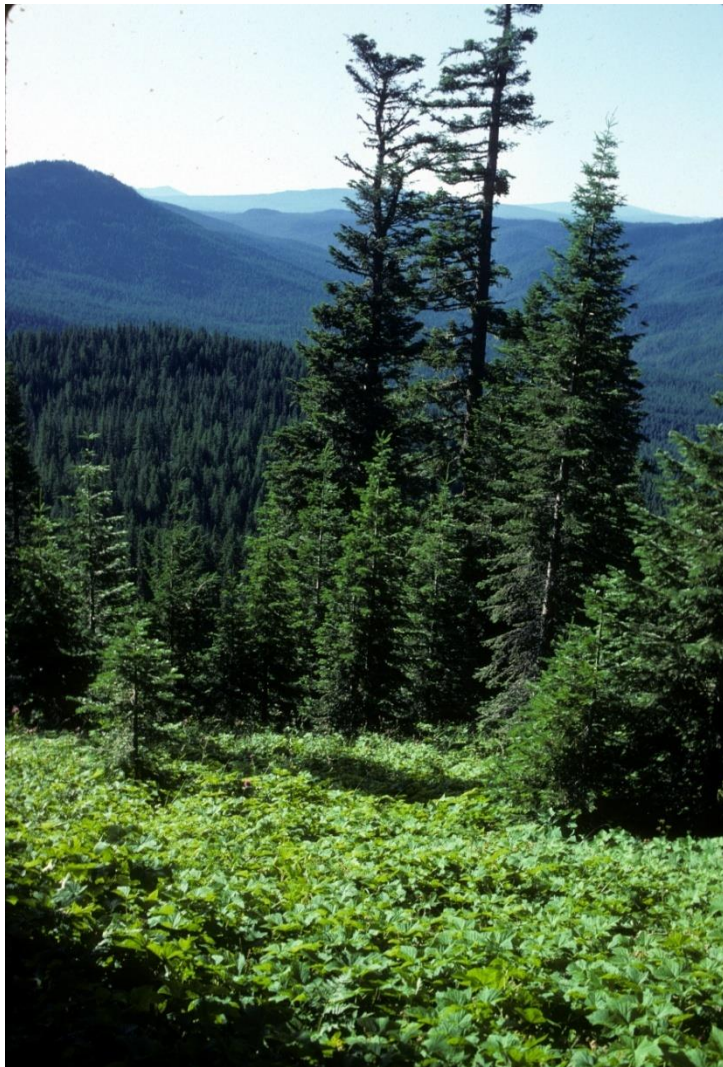

WLKR6_1993_7.13

WLKR6_1983_2.21, Azim. 154: from rock outcrop/edge of forest down transect line; large trees with various sized-trees below; CAPE5 meadow below photo point, RUPA meadow downslope of that.

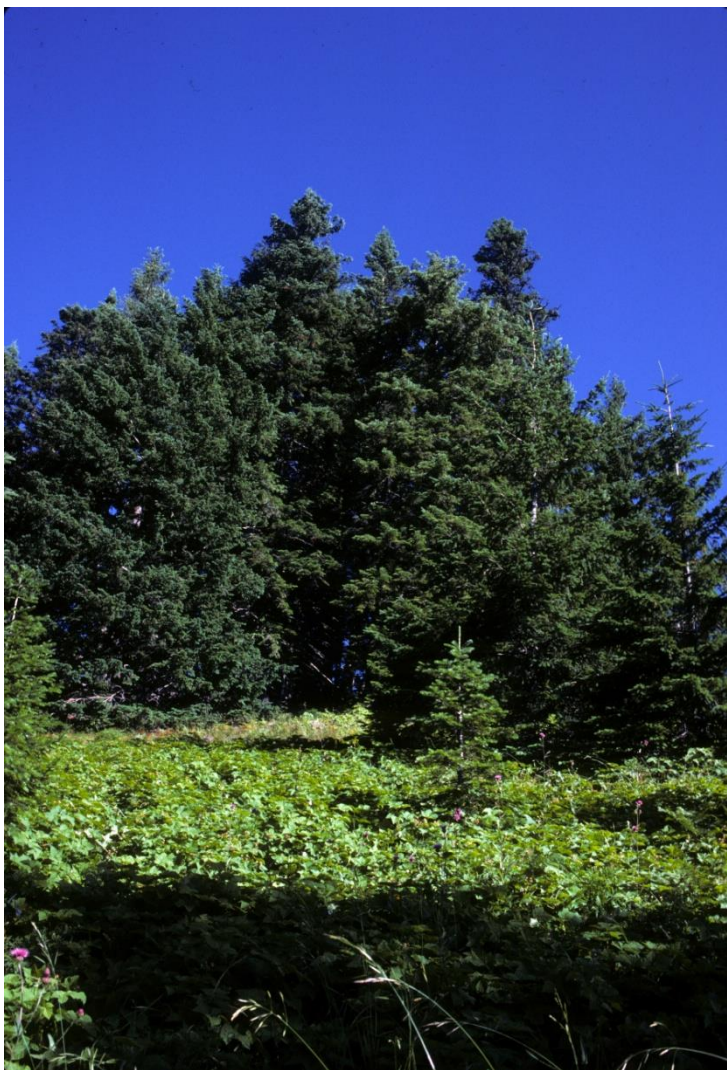

WLKR6_1993_7.14, Azim. 154: from 8 meter mark.

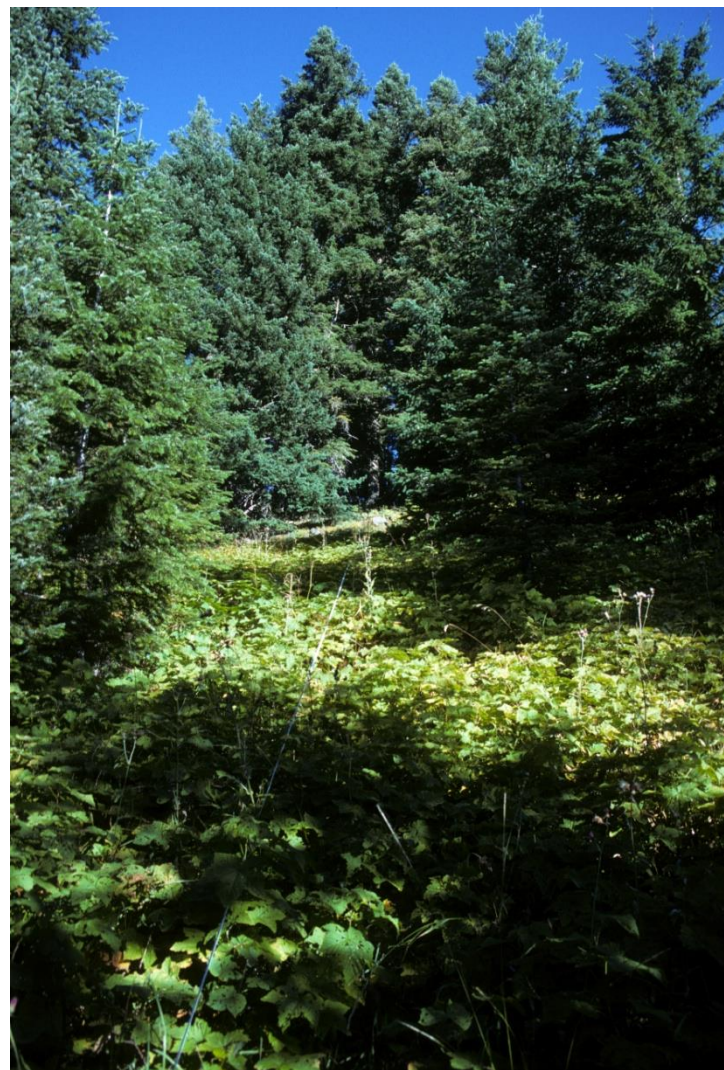

WLKR6_1983_2.22, Azim. 154: from rebar #2 @ 30.0 m looking down transect line; transect runs to the L of the leftmost large ABGR.

WLKR6_1993_7.15, Azim. 154: comment states "2 m below the 50 m rebar", but rebars are at 30 m and 59 m.

WLKR6_1983_2.23, Azim. : from ~8 m uphill of rebar #3 @ 59.0 m toward forest; RUPA meadow immediately above, then CAPE5 rocky type; note various aged ABGR.

WLKR6_1993_7.16

WLKR6_1983_2.25, Azim. 190: toward rebar #5 @ 115.0 m; taken ~25 m across slope from transect; note large ABGR, PSME and smaller reproduction beneath.

WLKR6_1993_7.18

WLKR6_1983_2.26, Azim. 236: directly across slope from last trees on transect where rock outcrop separates trees from meadow. Note meter tape, rock, and small *Abies* below base of outcrop. 1983 and 1993 photos are not well aligned (snag in 1983 has fallen?)

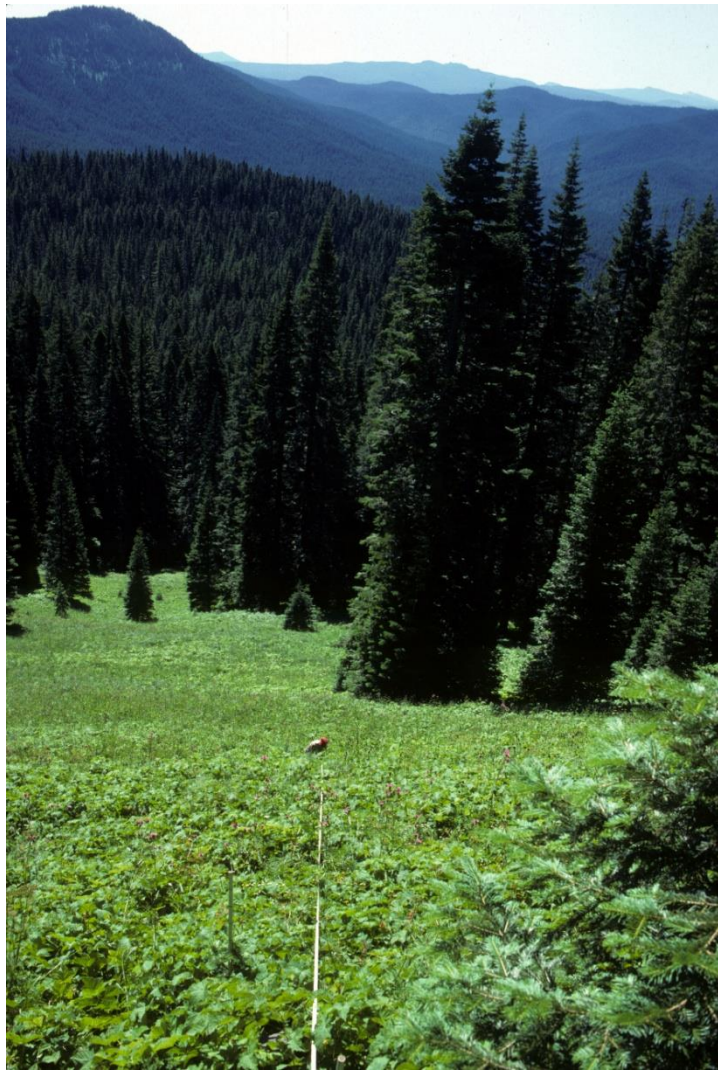

WLKR6_1993_7.19

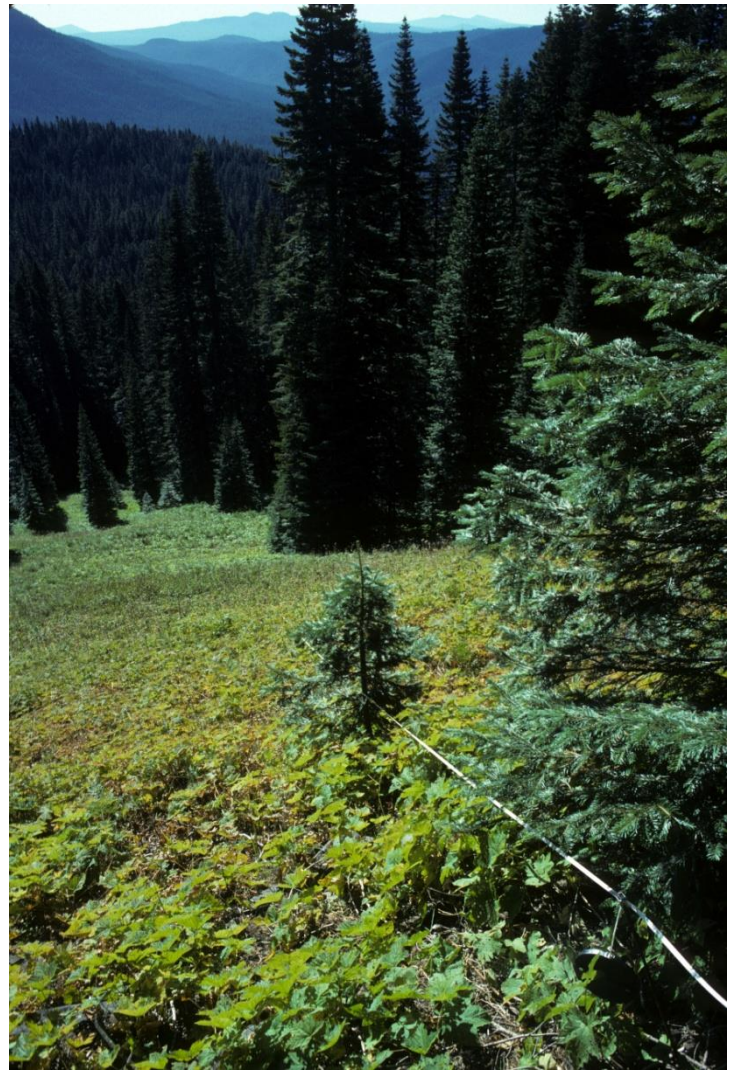

WLKR6_1983_2.27, Azim. 334: ~25 m down from rock outcrop; same trees in this photo as in 2.26 (3-4 feet tall); RUPA/RUOC/LIGR meadow. Denise Fidel is on the transect line. Note meter tape in 1993 photo.

WLKR6_1993_7.22

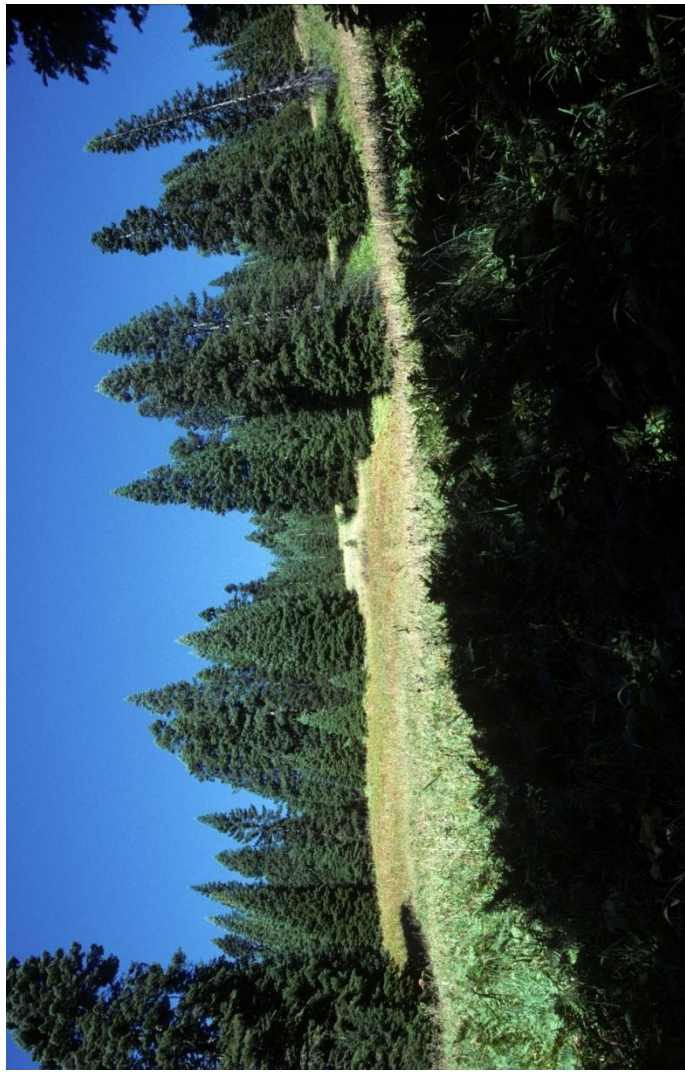

WLKR6_1983_2.28, Azim. 154: from rock outcrop (see photos 2.26 and 2.27) to end-point rebar @ 150.0 m; RUPA meadow. Note small *Abies* in 1993 photo (same as in previous photos).

WLKR6_1993_7.21

WLKR6_1983_2.29, Azim. 317: from "last ABGR on L of trail" (see transect directions) to rebar #5 @115.0 m, rock outcrop, and invasion group; note dry *Gilia aggregata* patch to R of rock.

WLKR6_1993_7.23. See next page for 2009 (two photos).

WLKR6_2009_1 and WLKR6_2009_2. Taken from different photo points than 1983 and 1993.
