Thumbnail images are labelled by transect code, year, and photo number. Full size images with captions follow on subsequent pages.

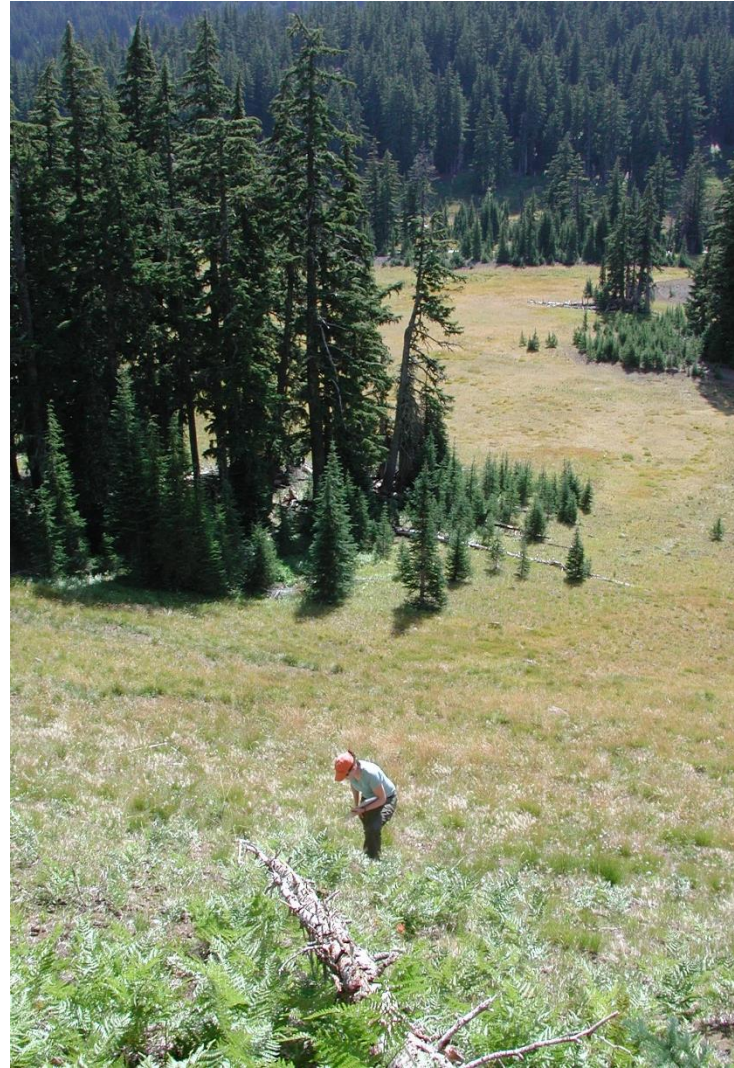

LINT17_1983_6.1, Azim. 22: from meter mark 24 up transect line to "forest stand". Note PTAQ meadow, large TSME and ABLA2/TSME reproduction; meadow/forest patches rather than edge.

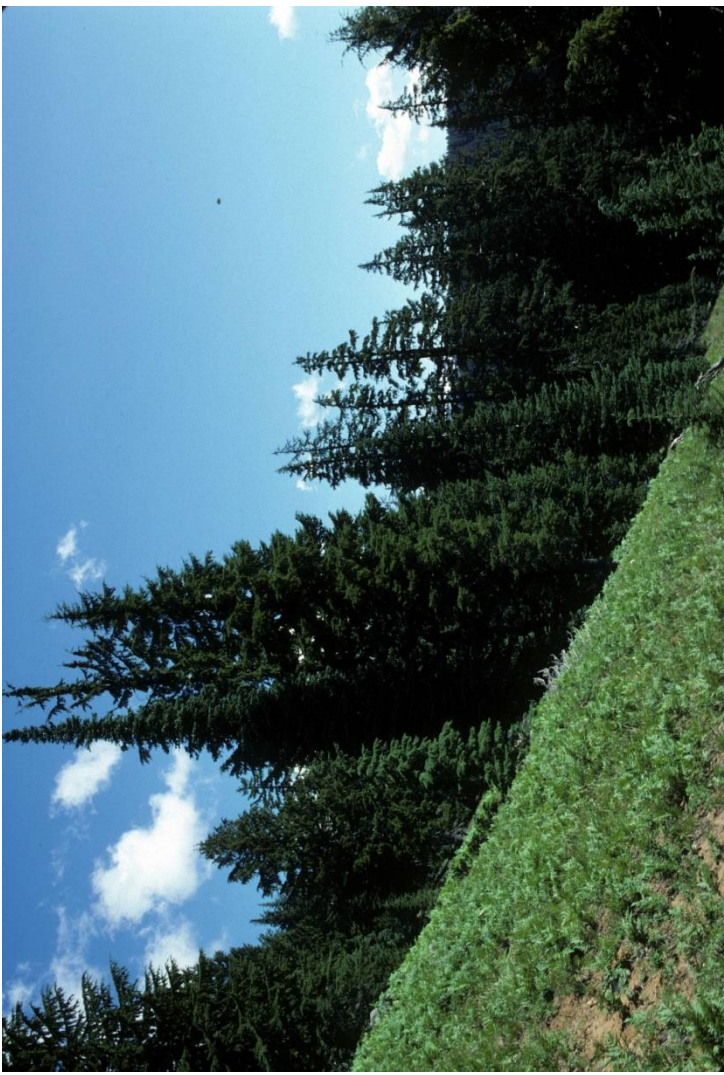

LINT17_2009_1760

LINT17_1983_6.5, Azim. 202: from 36 m mark down the transect line; in FEVI meadow surrounded by ABLA2 on R and TSME on L; meadow flattens below to *Carex nigricans*/*C. spectabilis* type.

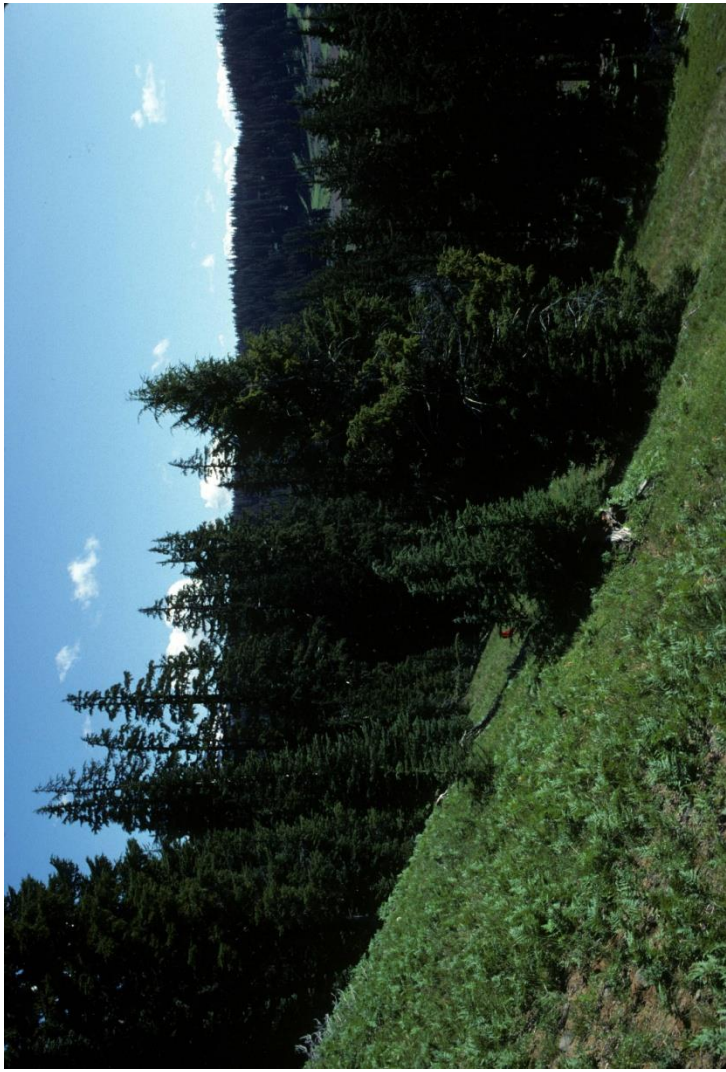

LINT17_2009_1760. Note significant tree invasion and growth on the flat below the transect.

LINT17_1983_6.2, Azim. 145: #1 photo of panorama (see also photo 6.3) across to forest patch #2 (where rebar #1 lies @30 m) beneath PTAQ meadow. Note large TSME/ABAM; PTAQ meadow in foreground

LINT17_2009_1771. Note persistence of bare soil in the foreground.

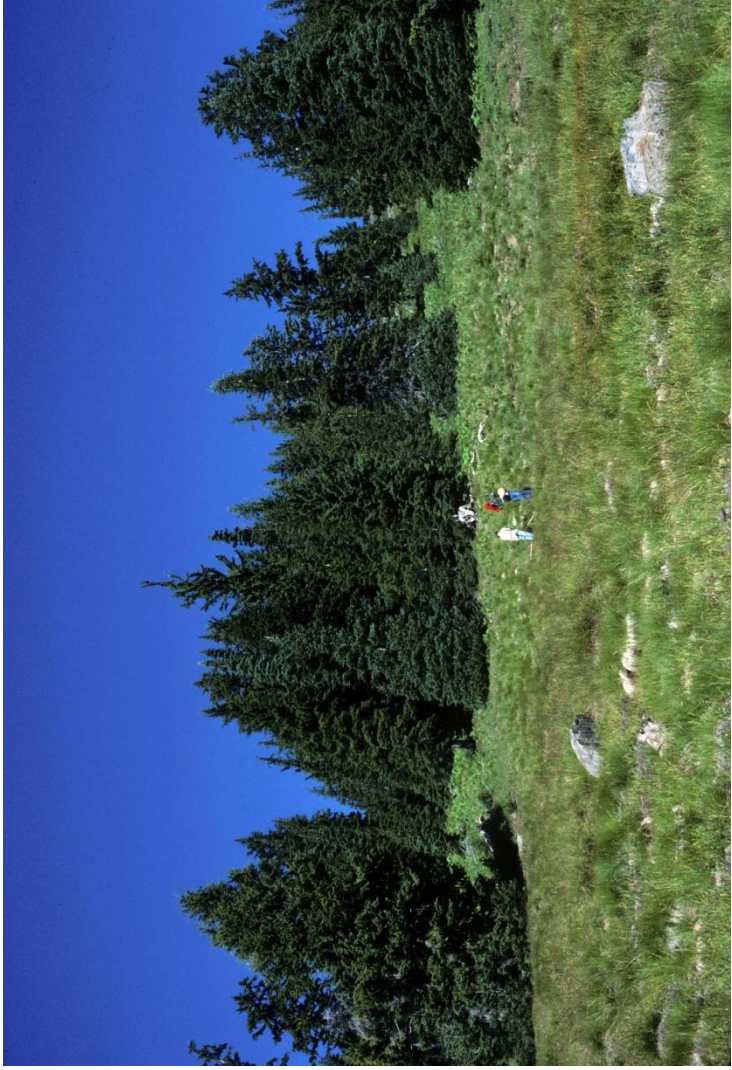

LINT17_1983_6.3, Azim. 155: #2 photo of panorama (see also photo 6.2). Lower FEVI meadow with reproduction; trees obstruct rebar #2 (@60 m); red shirt at 59 m mark.

LINT17_2009_1773

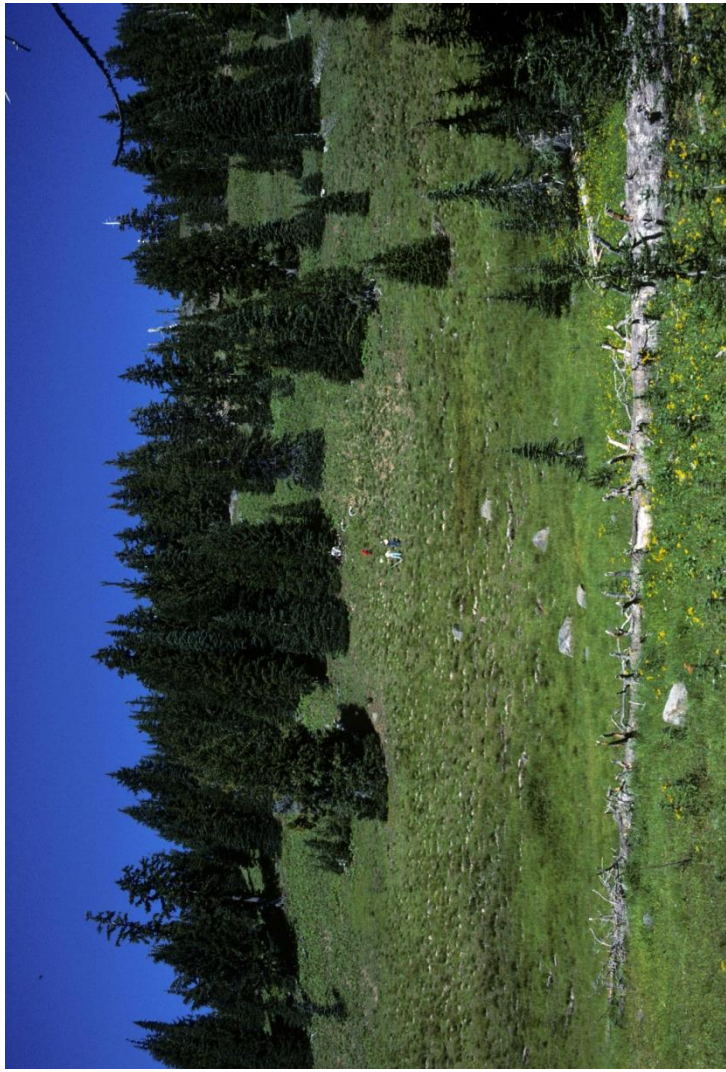

LINT17_1983_6.6, Azim. 100: ~40 m from rebar #2 (@60 m); FEVI meadow with ABLA2 and TSME reproduction (uneven aged), some stumps (centers of recolonization), one at edge of the second forest clump (above). No 1993 or 2009 photos.

LINT17_1983_6.7, Azim. 35: ~50 m below end of transect where *Carex spectabilis* begins and slope declines; *Festuca* meadow above with mixed stands of TSME/ABLA2 of varying age; ABLA2 smaller.

LINT17_2009_1779

LINT17_1983_6.8, Azim. 37: from flat of Linton Meadow below *Carex nigricans*/*C. spectabilis* type; entire area of *Festuca*/*Pteridium* meadow uphill with invasion lobes. No 1993 or 2009 photos.
