

FUSION Gridmetrics Parameters
Cell size = 15 m
Mean height for all elevations
First returns

Height Above
Ground (m)

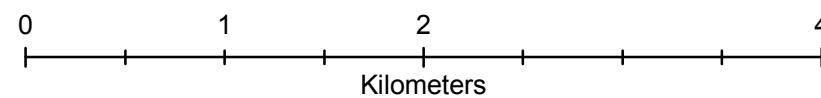

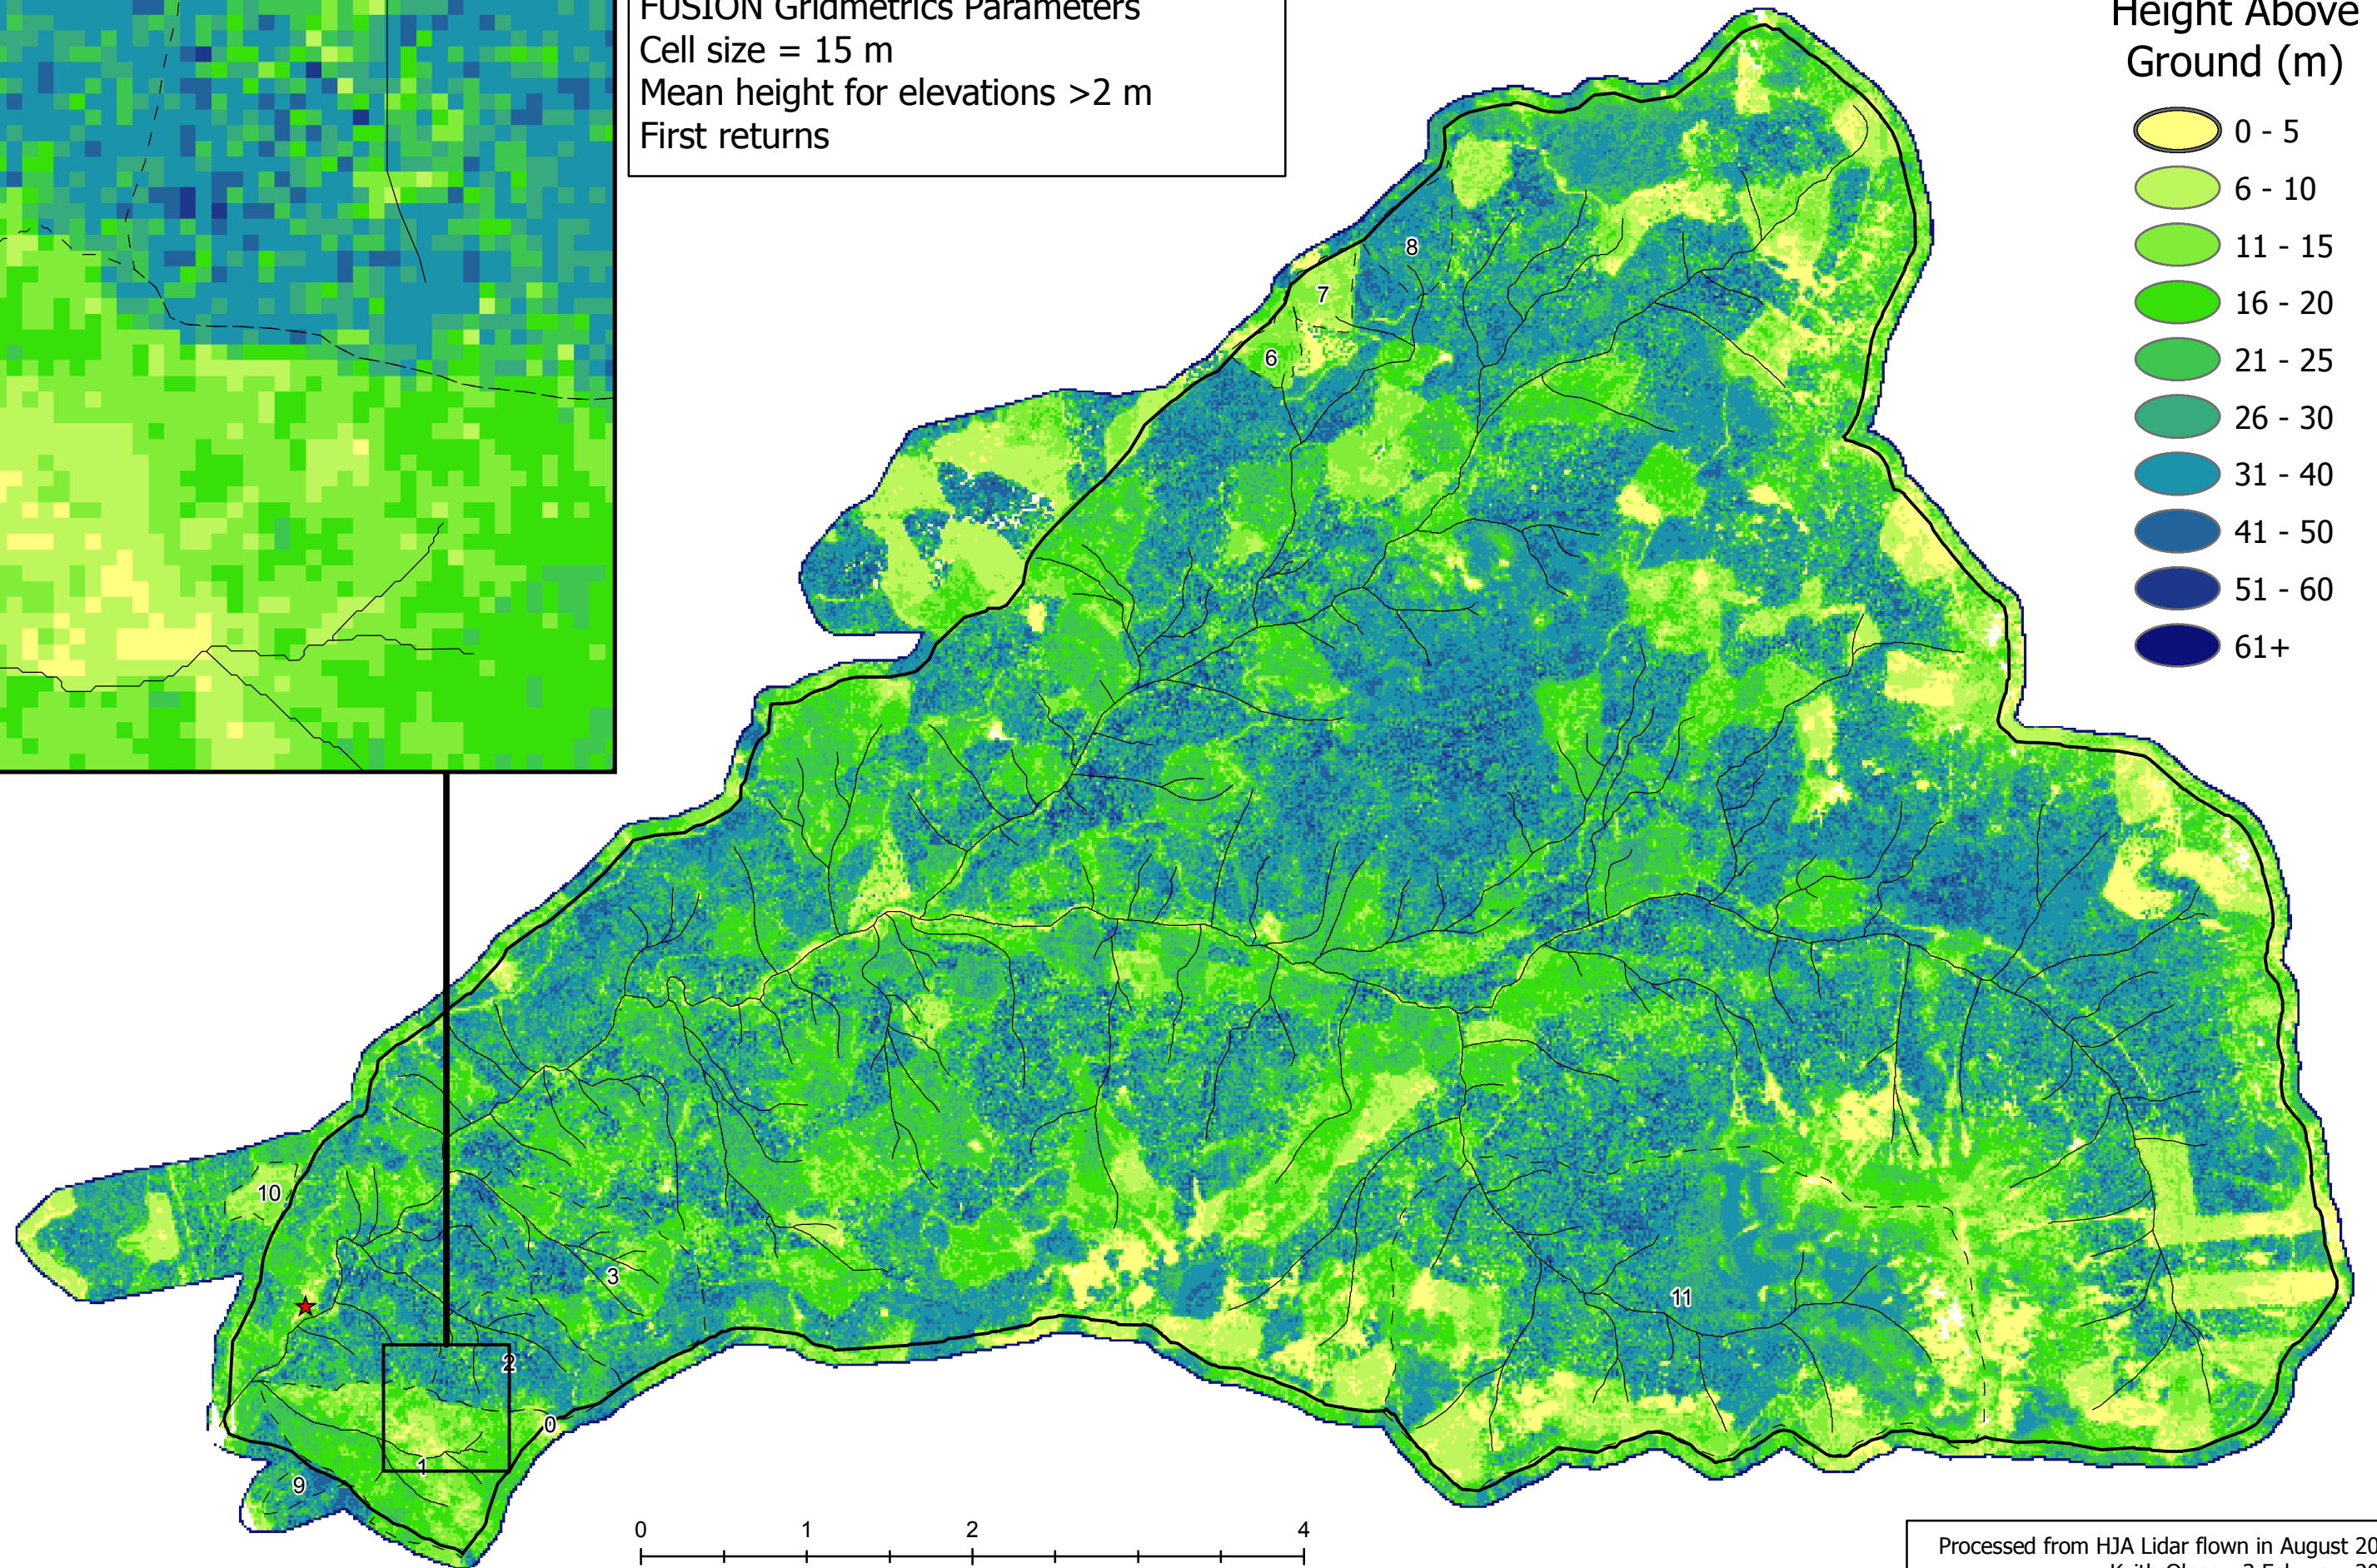

Processed from HJA Lidar flown in August 2008
Keith Olsen - 4 February 2010
Universal Transverse Mercator, zone 10, NAD83

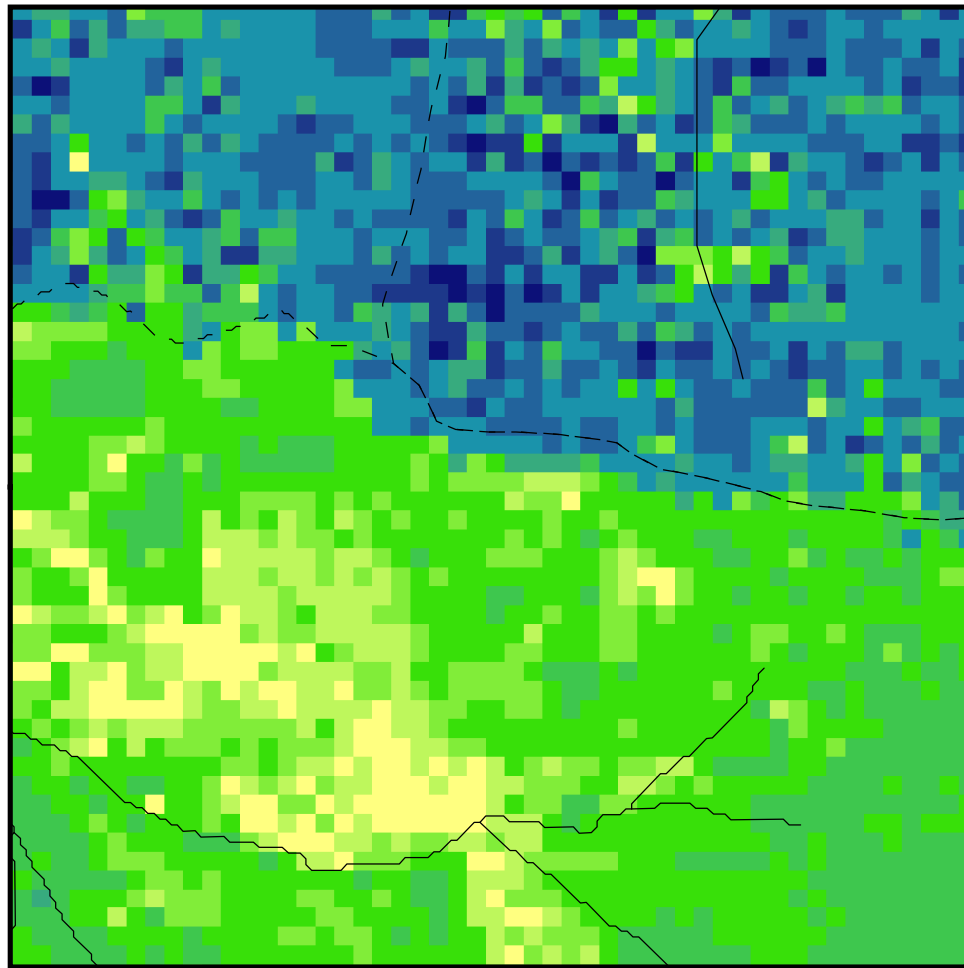

FUSION Gridmetrics Parameters
Cell size = 15 m
Mean height for elevations >2 m
First returns

Height Above
Ground (m)

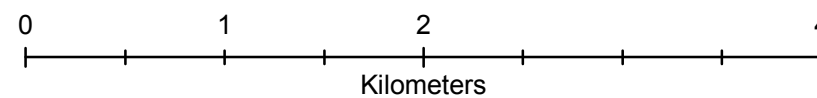

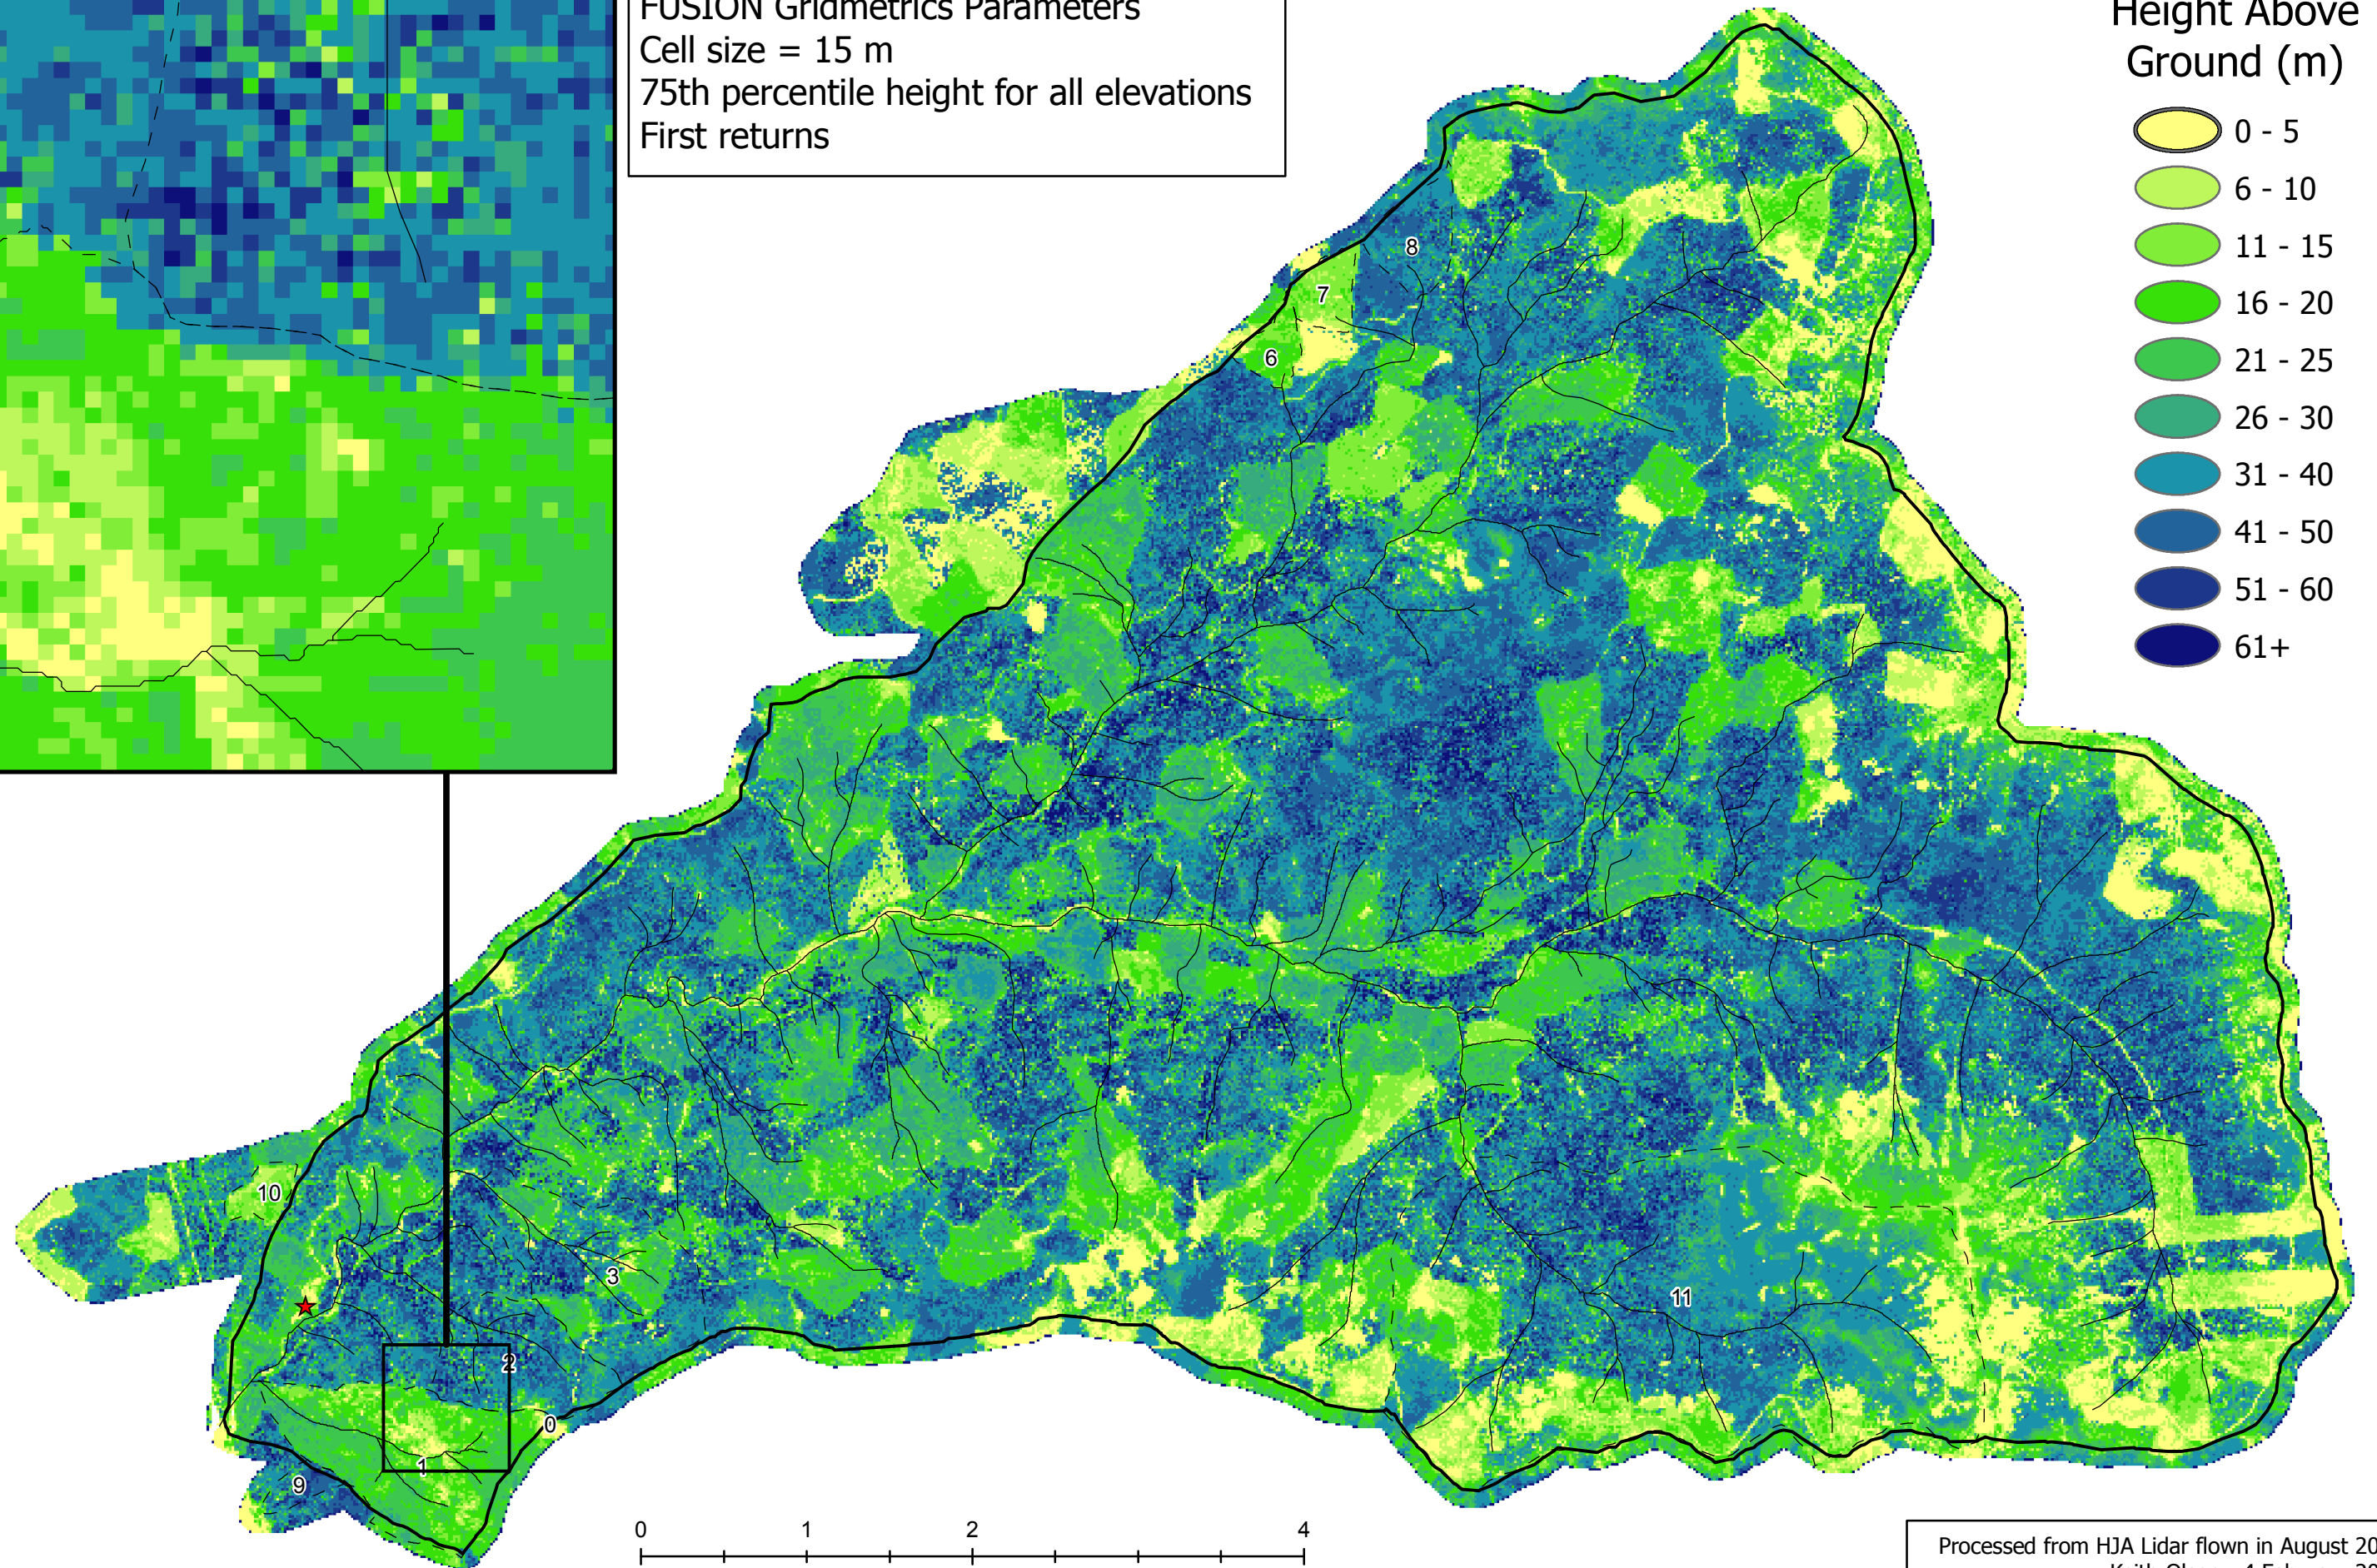

Processed from HJA Lidar flown in August 2008
Keith Olsen - 3 February 2010
Universal Transverse Mercator, zone 10, NAD83

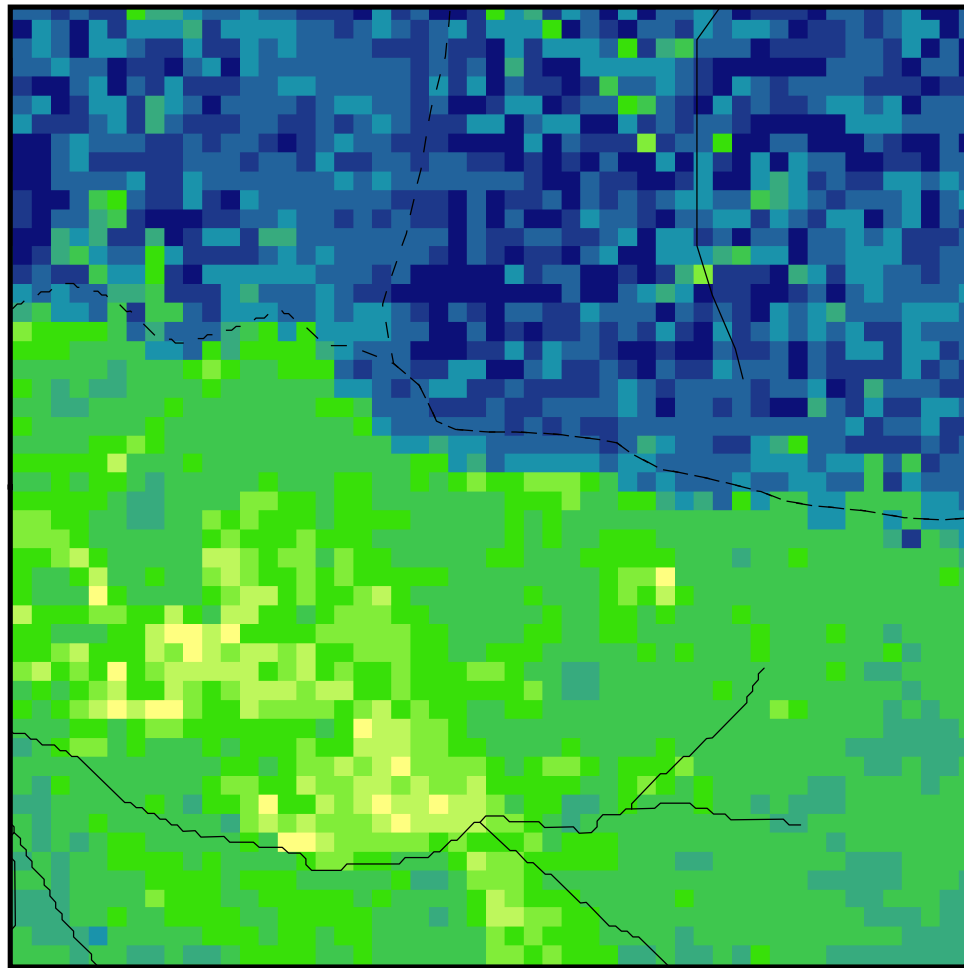

FUSION Gridmetrics Parameters
Cell size = 15 m
75th percentile height for all elevations
First returns

Height Above
Ground (m)

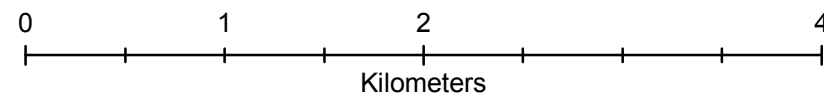

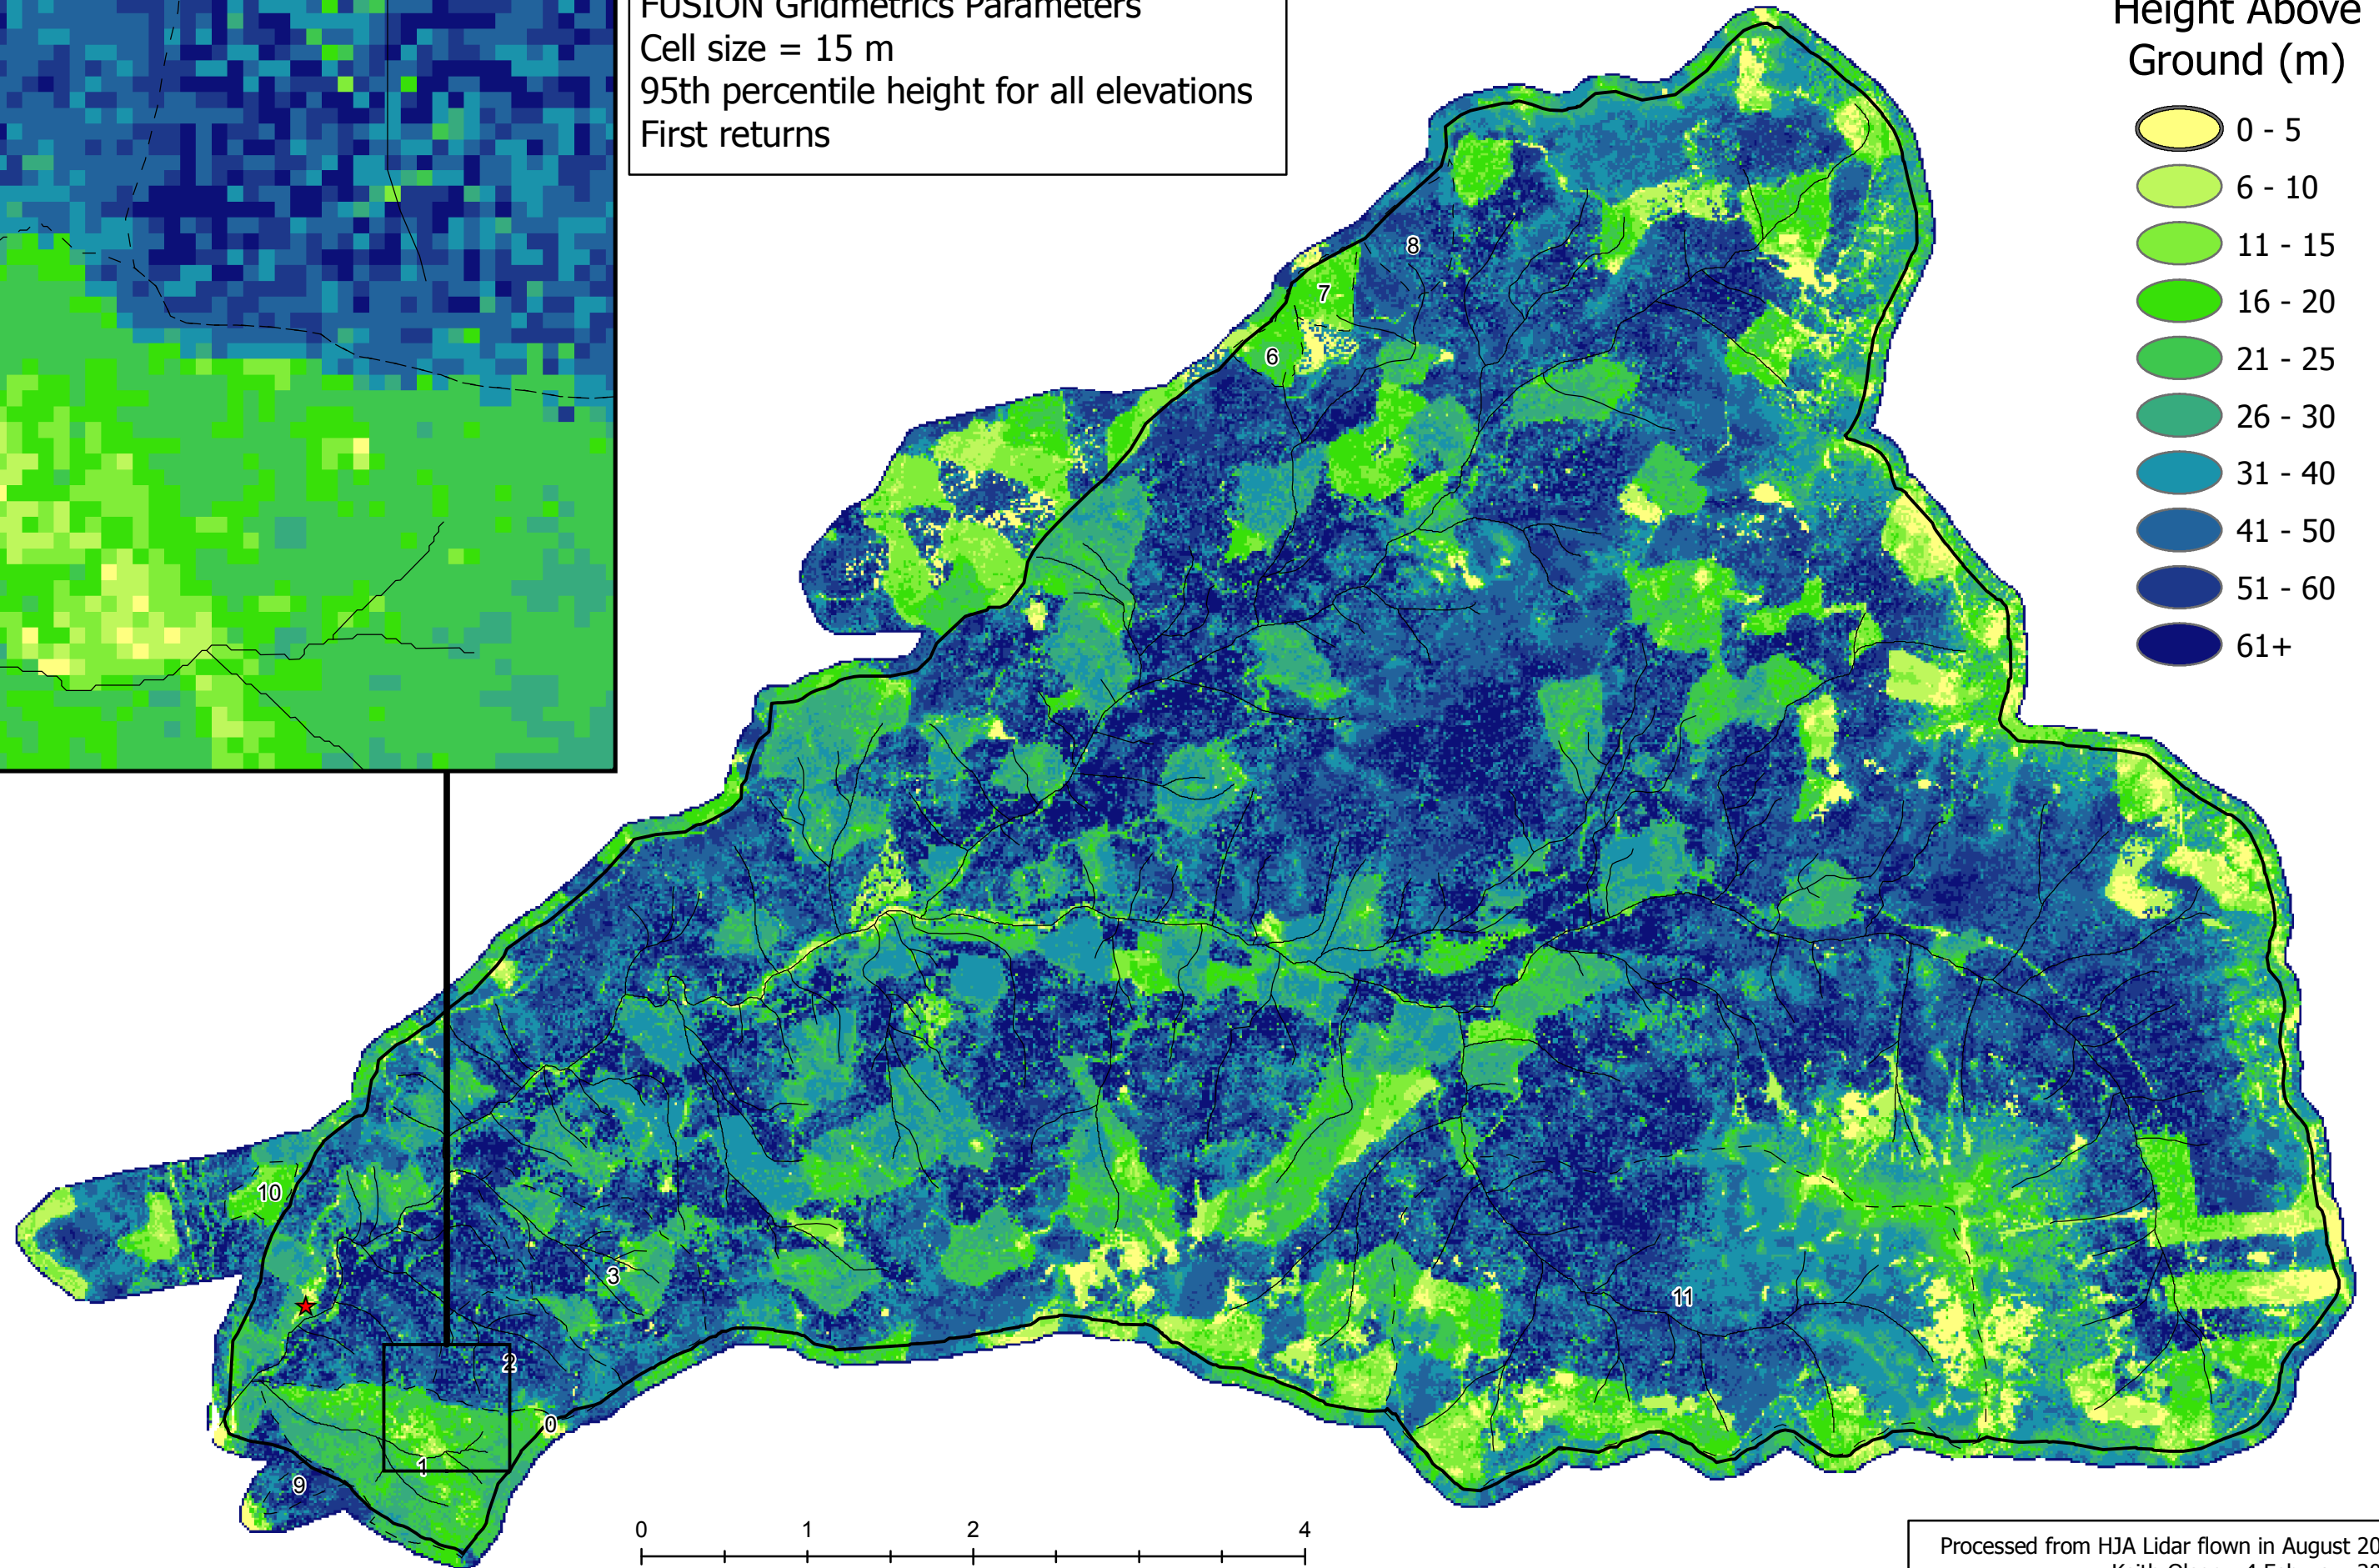

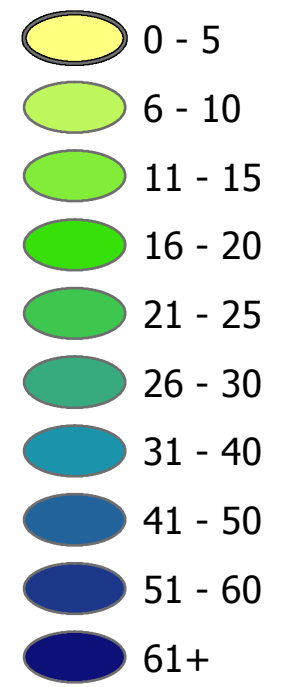

Processed from HJA Lidar flown in August 2008
Keith Olsen - 4 February 2010
Universal Transverse Mercator, zone 10, NAD83

FUSION Gridmetrics Parameters
Cell size = 15 m
95th percentile height for all elevations
First returns

Height Above
Ground (m)

Processed from HJA Lidar flown in August 2008
Keith Olsen - 4 February 2010
Universal Transverse Mercator, zone 10, NAD83
