

Distribution of experimental blocks at the Starrbright study site

1 x 1 m sample plot within 2.5 x 2.5 m treatment (species removal) area; removal treatments (A-I) are assigned randomly to plots within each block

Starrbright study site removal treatments for the nine treatments include:

Treatment codes	removal species	Response variable
A	Control (no removal)	Community
B	Senecio sylvaticus removed	Community
C	Epilobium angustifolium removed	Community
D	S. sylvaticus/E. angustifolium removed	Community
E	S. sylvaticus/Community removed	E. angustifolium
F	E. angustifolium/Community removed	S. sylvaticus
G	Community removed	S. sylvaticus and E. angustifolium
H	Rubus ursinus removed	Community
I	Berberis nervosa/Gaultheria shallon removed	Community
