Burnout on west control line Lookout Ridge

Panorama 090 taken on 09/20/23 from top of rock outcrop/quarry on road 130, focusing on Lookout ridge and burn mosaic from combination of firing operations and unmanaged spread. Burnout operations along fire line were conducted over many days. Aerial ignitions were also used in this area to increase depth of containment line. Units are harvest units as numbered on the HJA Forest Base Map:
