

“In It for the Long-Term: Lessons from the H.J. Andrews Experimental Forest”

H.J. Andrews Long-Term Ecological Research (LTER) Seventh Annual Symposium

**Monday, February 7, 2005
Memorial Union, OSU campus**

AM session – Memorial Union Leadership Center (east end of first floor)

9:00 Welcome and introductions- Sherri Johnson, PNW Research Station, USFS

9:05 Overview of H.J. Andrews LTER Central Questions

Barbara Bond, Forest Science, OSU

9:20 Moving from site to region: Approaches to spatial scaling

Fred Swanson, PNW Research Station, USFS

9:50 Models as communications tools for multidisciplinary science

Jeff McDonnell and Kellie Vache, Forest Engineering, OSU

10:25 Break and refreshments

10:45 Small basins as integrating frameworks for understanding ecosystem processes: 50 years of experiments, process studies, and models

Julia Jones, Geosciences, OSU

11:15 Temporal behaviors: A key to predicting long-term ecosystem dynamics

Mark Harmon, Forest Science, OSU

Afternoon session – Memorial Union Room 109

12:00 Lunch

(There is no fee but registration is required)

1:00 – 3:30 Posters: Recent findings and current research

Through collaboration:

**OREGON STATE
UNIVERSITY**
